

SCHOOL-BASED DECISION MAKING

School: Fern Creek High School

Subject of the Policy: Technology Use

Policy Statement

Technology use in the twenty-first century has become a vital component of all aspects of life. For students to be contributing citizens, they must receive an education that incorporates and provides equitable access to technology in all aspects of learning. Students at Fern Creek High School will be competent users of technology and use technology to support learning in core content subjects. Fern Creek School will create competent digital citizens by providing integrated Internet safety and digital citizenship instruction to all students.

All students at Fern Creek High School will demonstrate technology competency prior to graduation per the current *Student Progression, Promotion, and Grading (SPP&G) Handbook*, which includes authentic demonstrations of technology competency incorporated during the defense process through the Backpack of Success Skills.

Within the constraints of the budget, the Council will ensure that the technology infrastructure is modern and fully functional and that it meets the teaching, learning, and operational needs of all stakeholders. School personnel will develop and administer needs assessments and use the resulting data to develop and implement a technology plan to continuously improve technology services and infrastructure. The principal will implement this process to address technology use and barriers, and the resulting plan will be monitored by the Council.
